

## 1. Period Highlights ${ }^{(1)}$

In the last quarter of 2023, Cencosud resiliently faced the challenges that arose from a volatile economic environment, where Latam and the United States markets continued in a context of high interest rates, despite a downward trend in inflation. In parallel, the Company's results in 4Q23 were negatively impacted by the rapid and strong devaluation of the Argentine peso.

In this context, Cencosud demonstrated effective management in a volatile environment. In 4Q23 (Excluding IAS29) the Company reported an increase in revenues of $\mathbf{2 . 8 \%}$, explained by the strength of the Supermarkets format, with revenues increasing in almost all the countries where we operate, despite the slowdown in food inflation that occurred with greater emphasis in the second half of $\mathbf{2 0 2 3}$. Offsetting the growth in revenue, discretionary businesses in Chile continue to record sales declines compared to 4Q22, however, sequential improvements have been noted over the course of the year. In this context, Argentina stands out, which despite its complex economic situation achieved sales growth above the average inflation of the quarter in Supermarkets, Home Improvement and Shopping Centers, which translates into a double-digit increase when measured in CLP. Meanwhile, revenues from the digital channel increased $3.6 \%$ compared to 4 Q 22 , driven both by new developments and new strategic alliances with last miler operators.

Cencosud continued to strengthen its proposal in the physical channel with the opening of 44 stores during the year, opening 12 stores in 4 Q 23 , of which 8 are Supermarkets. With this, the openings of the quarter represent an increase of almost $\mathbf{1 6 , 0 0 0} \mathbf{~ s q m}$ of selling space.

With respect to the Private Label strategy, it continues to be strengthened through the various initiatives and developments in the region. In this context, the regional brand Cuisine \& Co stands out again with double-digit sales growth compared to 4Q22, contributing to achieving annual Private Label Food category sales of over US\$1 billion in LATAM for the first time. Meanwhile, as part of the strategy to expand the offering of differentiating products, during the quarter the La Hacienda brand was launched in Chile and Peru, with premium kitchenware and grill products. These initiatives allowed us to reach a Private Label penetration of $\mathbf{1 5 . 8 \%}$ of total revenues in 4Q23.

Adjusted EBITDA margin.

Adjusted EBITDA for the quarter grew 8.7\%, achieving an Adjusted EBITDA margin of $\mathbf{1 1 . 8 \%}$ (+64 bps YoY), explained by the increase in contribution and profitability of Argentina, the United States and Peru. In this context, Argentina posted a historic Adjusted EBITDA margin of 17.9\%, the United States, in turn, achieved an EBITDA margin of 11.5\% in 4Q23 and Peru increased its profitability by 206 bps YoY, reaching 12.6\%

Net Income expanded $49.2 \%$ YoY in 4 Q 23 , reaching US $\$ 418$ million, explained by the increase in Adjusted EBITDA and the improvement in Non-Operating Income. The latter was favored by the $18.6 \%$ reduction in the Net Financial Cost, in addition to the lower impact of inflation associated with the debt denominated in UF and a reduction in deferred taxes as a result of the difference between tax and financial fixed assets generated. due to inflation in Argentina.

## 3. Message from the CEO

2023 was a year marked by a complex macroeconomic environment with high interest rates, which resulted in a reduction in consumption levels and low levels of growth. At the same time, the Andean countries suffered the effects of the "El Niño" climate phenomenon and at the end of the year, Argentina experienced a historic devaluation of its currency.
All of these factors led Cencosud to report revenue growth of $0.2 \%$ and a drop in Adjusted EBITDA of $6.7 \%$ versus the previous year. However, when excluding the effects of Argentina's hyperinflationary economy (IAS 29), the Company registered revenue growth of $6.6 \%$ for the year and an increase in Adjusted EBITDA of 3.0\% YoY.

> 670 million Tickets in 2023
> +8.9\%
> vs 2022

The number of sales tickets increased $8.9 \%$ during the year, and exceed 670 million tickets, as a result of our customers' continued preference for our physical store formats and digital channels. In 2023, Supermarkets demonstrated resilience by achieving revenue growth of $10.6 \%$ YoY at a consolidated level (excluding the impact of hyperinflationary economy in Argentina), despite the sequential slowdown in food inflation in all countries where Cencosud operates, with the exception of Argentina. The Company continued to develop the value proposition through the physical channel, with the opening of 44 stores, and the remodeling of 184 retail stores, along with the inauguration of the new shopping center in the district of La Molina, Peru. During the year we continued to strengthen the online channel, to achieve our goal of being the e-grocery leaders in Latam, closing new alliances with leading last milers, DoorDash and Uber Eats in the United States and iFood in the case of Brazil. As a result, online sales in the United States grew in 106.4\% YoY in Chilean pesos and 18.1\% YoY in Brazil. Likewise, during 2023 the Prime subscription program completed its presence in the 5 Latin American countries in which we operate, achieving subscriber growth of 59\% YoY. The year 2023 was a year of

## E-grocery 2023 Leaders Chile \& Peru

 consolidation of the digital ecosystem for us with the launch of CencoPay, an electronic wallet that enables payment methods to be managed digitally and securely. In the same way, Cencosud Media continued its geographic expansion and its retail media value proposition for suppliers is now available in the 5 Latin American countries where we operate.Regarding profitability levels, we closed 2023 with a reported EBITDA margin of 9.7\%. Excluding adjustments for hyperinflation in Argentina, EBITDA margin reached 10.7\%, a contraction of 38 bps vs 2022. This reduction in 2023 was due to greater promotional levels in the industry, increasing labor costs, lower levels of consumption and even the effects associated with the "El Niño" phenomenon. Despite this, 2023 was Cencosud's 3rd consecutive year with double-digit EBITDA margin and is the result of a strategy focused on profitable growth and digital innovation. An example of this is the "Mi Local" app, a tool that simplifies, centralizes and streamlines store operational management with multiple functionalities associated with found rate, out-of-stock alerts, pre-waste management and automated price adjustments, among others. This initiative, which boosts store and shopping center sales and profitability has already been implemented in nearly 900 of the group's stores, which implies 100\% progress in the proposed 2023 rollout goals for Chile, Brazil, Colombia and Peru.

The strengthening of our regional Private Label model has bolstered our value proposition for customers and yielded a positive impact on Cencosud's profitability. In 2023, this progress was reflected in a new record for Private Label annual sales, reaching US\$2.5 billion, with a sales penetration of $\mathbf{1 5 . 5} \%$. Through initiatives such as these we are confident in sustaining profitability margins above Cencosud's historical averages in the years to come.

Shifting our focus on the future, we have a robust Investment Plan of US\$ $\mathbf{6 4 1}$ million for 2024, which will boost our physical proposition by expanding the selling space by nearly $\mathbf{5 0 , 0 0 0} \mathbf{~ s q m}$, representing an increase of around $80 \%$ compared to 2023 . This plan is focused on accelerating our organic growth, innovation, strengthening the physical-digital ecosystem, and achieving greater operational efficiencies and profitability.

Together with the Cencosud team will continue to promote our 5 Strategic Pillars with conviction: Financial Strength, Growth, Innovation \& New Trends, Talent and Sustainability. With the honor of having recently been appointed CEO of Cencosud, I am committed to continuing to lead our team to new achievements and consolidating our positioning in the different markets in which we operate, with special emphasis on customer satisfaction and agile innovation, to ensure we stay at the forefront of the industry at a global level and propel the Company's sustainable growth.

### 7.3 Private Label

During the fourth quarter of 2023, Private Label products reached a penetration of $15.8 \%$ total sales, reflecting a decrease of 108 bps compared to the same period in 2022. This reduction was primarily due to the contraction of Non-Food sales in the region. Nonetheless, Food Private Label products saw sales growth in the quarter exceeding inflation and third-party sales, particularly in the consumer goods and perishable categories.

When looking at the full year 2023, the Company achieved relevant milestones in both Food and Non-Food categories. In 2023, the Private Label Food products in Latam achieved a sales milestone, surpassing US\$ 1 billion in a single year for the first time, averaging double-digit penetration in the same period as our Cuisine \& Co brand increased 2023 total sales by 26,9\% surpassing US\$ 600 million. By contrast, despite experiencing a challenging year due to a widespread decline in discretionary spending, the Non-Food categories, increased gross margin (closing the year with a $23 \%$ reduction in inventory), while launching the first Premium line kitchenware and grill: La Hacienda.

The Private Label strategy, focused on higher value categories, together with the prioritization of brands with high growth potential and the expansion of the offer mix, resulted in $\mathbf{5 . 8 \%}$ YoY increase in sales of 4Q23 versus 4Q22.

## Supermarkets

In 4Q23, revenues remained stable (0.0\% YoY). During the quarter, 4 new stores were opened, while online sales increased $2.2 \%$ YoY, driven in part by the $20.7 \%$ increase in Jumbo Prime subscribers compared to December 2022 as it captured subscribers from other digital platforms and consolidating its leadership in e-grocery in the country. This was offset by a

SM Online Sales
 negative SSS of $0.5 \%$ YoY, as a result of widespread contracted consumption and higher levels of promotional activity.

Adjusted EBITDA decreased 3.7\% compared to 4Q22. However, Adjusted EBITDA margin remains resilient at $13.2 \%$ despite the increase in expenses associated with inflation and greater promotional activity in different categories. These negative effects were offset by an improvement in gross margin due to better negotiations with suppliers.

[^6]
## Home Improvement

Revenues decreased $12.2 \%$ compared to 4 Q 22 , reflecting still challenged consumption. As a result of the above, Home Improvement has worked on improvements in digital channels, implying stable online sales year-on-year despite the market contraction. Among these initiatives is the capacity to deliver in less than 2 hours and the incorporation of new SKUs to the Paris.cl Marketplace.

Adjusted EBITDA decreased $32.9 \%$ YoY, recording an Adjusted EBITDA margin of 9.0\%, despite a gross margin expansion of 175 bps YoY, attributable to lower promotional activity, healthier inventory levels and improvement in the indicators of shrinkage and inventory differences. At the same time, the business continues to automate processes to make them more efficient and thus control the increase in expenses associated with inflation.

## Department Stores

Revenues decreased 3.0\% YoY. This is partly explained by one less day of sales as a result of the constitutional plebiscite in Chile and a lower level of consumption of durable goods. However, throughout the quarter, monthly revenues improved sequentially, ending December with a slight growth in sales compared to December 2022. Marketplace sales increased $17.6 \%$ YoY with a total penetration of 19.7\% on Paris.cl online sales.

Adjusted EBITDA Margin
5.6\% +84 bps

Adjusted EBITDA increased $14.0 \%$ YoY, along with an improvement in the Adjusted EBITDA margin of 84 bps YoY. This is attributed to a 229 bps expansion of the gross margin, as a result of an improvement in the purchasing strategy and expenses increasing below inflation.

## Shopping Centers

Revenues increased $4.6 \%$ compared to 4 Q 22 despite the high comparison base, mainly due to a higher occupancy rate, contracts indexed to inflation and improvement in the commercial terms of new contracts. Additionally, revenue from both parking and Sky Costanera increased, reflecting a recovery in tourism and greater traffic in shopping centers. This partially offset the temporary closure of stores due to remodeling and expansion, more challenged consumption and a specific retroactive adjustment.
Adjusted EBITDA increased $2.3 \%$ YoY, mainly attributed to higher expenses associated with openings and marketing. The margin contracted 175 bps to $78.8 \%$.

## Financial Services

Adjusted EBITDA was CLP 3,239 million (vs -6,454 million in 4Q22), reflecting growth in portfolio volume and higher interest collection. This is partially offset by higher expenses resulting from enhanced commercial and collection efforts.

### 8.4 Argentina ${ }^{(9)}$

## Quarter Highlights:

- Supermarkets, Home Improvement and Shopping Centers revenue increased above the inflation average for the quarter ${ }^{(10)}$, exceeding the 200\% increase YoY.
- Cencosud Argentina completed 2 consecutive years reporting double-digit EBITDA margin, reaching an all-time high of $\mathbf{1 7 . 9 \%}$ in 4Q23.

## Supermarkets

Revenues increased 200.7\% in ARS and 17.7\% in CLP compared to 4Q22. The growth observed in local currency reflects the ability to pass on inflation to the final price in most categories, despite reaching maximum limits on price increases for certain SKU for most of the quarter. SSS for the physical stores was 201.7\%.

Adjusted EBITDA increased $368.1 \%$ in local currency and $72.4 \%$ in CLP compared to the same period of the previous year, while the Adjusted EBITDA margin expanded 342 bps. This is mainly attributed to an

## SM Same

 Store Sales 201.7\% expansion of 571 bps in the gross margin, driven by the end of price restrictions during December, coupled with the revaluation of inventory.
## Home Improvement

Revenues increased $200.1 \%$ in ARS and $19.7 \%$ in CLP, as a result of a better performance of the wholesale channel, along with sales growth above inflation, and increased demand during the month of December given expectations of further price increases.
Adjusted EBITDA increased $387.7 \%$ in ARS and $81.9 \%$ in CLP versus the same period of the previous year, explained by revenue growth and gross margin expansion from the inventory revaluation. This, along with the ability leverage expenses over revenue contributed to an improvement of 1269 bps in the Adjusted EBITDA margin.

[^7]
## Shopping Centers

Revenues grew by $217.8 \%$ in ARS and $24.2 \%$ in CLP. In the quarter, the business showed an increase in occupancy rate of 595 bps compared to 4Q22, along with an increase of $8.3 \%$ in foot traffic, in addition to the opening of new stores. Meanwhile, collections and expired contracts metrics have normalized during the year.
Adjusted EBITDA increased by $271.1 \%$ in ARS and $40.0 \%$ in CLP compared to $4 Q 22$. The increase in Argentine pesos reflects an improvement of $221.6 \%$ in the gross margin YoY, along with expense control initiatives that kept expense growth below inflation.

## Financial Services

During 4Q23, revenue increased 152.5\% YoY in ARS and 0.9\% in CLP, growing below inflation in local currency. Lower consumption was observed in the quarter as a result of a high level of interest rates, offset by a better performance in December as a result of the devaluation of the Argentine peso and its impact on international customer purchases.

Adjusted EBITDA increased 270.9\% in ARS and 45.3\% in CLP, due to revenue growth and a focus on risk management.

### 8.5 USA

## Quarter Highlights:

- The online channel grew $\mathbf{2 6 . 5} \%$ in local currency, resulting in a penetration of $6.1 \%$ in the quarter.
- Supermarkets SSS was 1.2\% despite weak consumption levels, higher promotional activity in the industry and a slowdown in food inflation.

## Supermarkets

Revenues decreased $2.4 \%$ in local currency and $4.3 \%$ in CLP. In part, this decrease is explained by a greater number of sales days in 4Q22 compared to 4Q23, however, Same Store Sales increased (1.2\%) compared to the same period in 2022. Online channel sales increase of 26.5\% YoY, strengthened by new partnerships with last milers Uber Eats and DoorDash, resulting in online penetration of 6.1\%.

Adjusted EBITDA declined 6.2\% in US dollars and 8.0\% in Chilean pesos due to lower gross margin given greater promotional activity and an increase in certain expense categories.

### 8.6 Brazil ${ }^{(11)}$

## Quarter Highlights:

- Increase in online channel sales of $\mathbf{5 6 . 0 \%}$ YoY in local currency, attributed to the focus on digital initiatives and the consolidation of new sales channels such as alliance with iFood, WhatsApp sale on Prezunic and launch of Prezunic Prime.
- The Cash\&Carry format reported an SSS of 3.5\%. This format represents $36.0 \%$ of the country's total sales.
- Opening of $\mathbf{2}$ Prezunic in Rio de Janeiro, continuing the pipeline of flag openings.

## Supermarkets

During 4Q23, revenues increased $0.8 \%$ in local currency and $4.8 \%$ in Chilean pesos compared to the same period in 2022. This is partially attributed to the performance of the Cash\&Carry format with a SSS of $3.5 \%$ and the performance of the online channel, which achieved growth of $56.0 \%$ in local currency. Also noteworthy is the expansion of the Prezunic brand with two new openings during the quarter, totaling 5 new stores that opened in 2023.

Adjusted EBITDA decreased 19.5\% in local currency and 16.2\% in CLP vs the same period of the previous year, partially explained by 72 bps compression in the gross margin and higher expenses (+9.5\%) in local currency.

## Financial Services

Adjusted EBITDA reflected an improvement compared to 4Q22, partially driven by better levels of portfolio delinquencies.

## Supermarkets

Revenues decreased $2.5 \%$ in local currency and $1.5 \%$ in CLP compared to 4Q22, as a Cash\&Carry SSS of $3.4 \%$, was partially offset by negative SSS of $3.4 \%$ in the supermarket format. The online channel increased $4.2 \%$ in local currency, also benefiting from the Wong Prime subscription service, which has shown a growth of $19.7 \%$ in the number of subscribers compared to 3 Q 23 and $521,7 \%$ compared to 4Q22.

Adjusted EBITDA decreased $7.1 \%$ in local currency and $6.2 \%$ in CLP compared to the same quarter in 2022. A double-digit EBITDA margin in supermarkets reflects process automation and efficiencies in logistics expenses, partially offset by an increase in maintenance expenses.

## Shopping Centers

In 4Q23, an increase in revenue of 4.5\% in local currency and 5.5\% in CLP

## Venta

 Same Store C\&C3.4\% was reported compared to the previous year, attributed to the increase in the occupancy rate of the Shopping Centers and driven by the Shopping Center from Arequipa. In December 2023, the new La Molina Shopping Center was inaugurated, with an investment that reached US\$100 million.

Adjusted EBITDA increased $3.3 \%$ in local currency and $4.4 \%$ in CLP, in line with the improvement in revenue. Adjusted EBITDA margin reached 84.5\% over sales.

## Financial Services

4Q23 Adjusted EBITDA experienced an improvement compared to the previous year, mainly explained by the reduction of customer portfolio penalties.

### 8.8 Colombia

## Quarter Highlights:

- Sales of Private Label Food categories increased 2.2\% YoY, with penetration expanding $\mathbf{6 0}$ bps YoY.
- Jumbo Prime subscribers increased 57.2\% since December 2022.

## Supermarkets

Revenues decreased $5.7 \%$ in COP and increased $9.9 \%$ in CLP. This is mainly attributed to the reduction in year-on-year sales of the Non-Food categories.
Adjusted EBITDA decreased $45.3 \%$ in COP and $35.5 \%$ in CLP YoY, as a result of the decline in revenues, greater promotional activity and the increase in expenses associated with inflation.

## Home Improvement

During the quarter, a decrease in revenues of $12.9 \%$ in COP and an increase of $0.8 \%$ in CLP YoY was recorded, as a result of a general contraction of the economy. However, the Company registered an increase in sales from the online channel due to the re-launch of the webpage and the new app.

Adjusted EBITDA decreased in COP and CLP, attributable to the decrease in revenue, greater promotional activity, as well as the increase in expenses linked to inflation.

## Shopping Centers

The business recorded a growth of $4.2 \%$ in revenues in local currency and $20.6 \%$ in CLP compared to the same period of the previous year. This performance is the result of the indexation of fixed charges to inflation, which is offset by a lower variable charge due to the contraction of tenant sales.
Adjusted EBITDA decreased of $8.2 \%$ in COP and increased $6.2 \%$ in CLP, resulting in EBITDA margin compression, due to an increase in the costs of basic services and expenses associated with inflation, above revenue growth.

Financial Services
The deterioration in results compared to 4 Q 22 reflects a high funding rate and higher portfolio provisions, while a slowdown in demand for loans was recorded.

## Assets

As of December 31, 2023, total Assets increased by CLP 558,886 million (excluding hyperinflation effect of Argentina, IAS 29) compared to December 2022, mainly derived from a growth in Non-Current Assets of CLP 684,446 million, partially offset by a decrease in Current Assets for CLP 125,560 million.

The increase in Non-Current Assets is attributed to the increase of CLP 197,194 of Property, plant and equipment vs December 2022, whereas on the other hand, Investment property increased CLP 185,945 million, reflecting 6.3\% and 6.7\% increases YoY, respectively. However, this growth was partially offset by a reduction in Current Assets, specifically in Trade Accounts Receivable of CLP 94,739 million as a result of a lower balance from credit cards charges along with a reduction of Inventories of CLP 93,012 million due to the change in purchase strategy and the normalization of inventory levels.

## Liabilities

As of December 31, 2023, Total Liabilities increased by CLP 313,450 million (excluding IAS 29) compared to December 2022, attributed to an increase in Current Liabilities of CLP 46,818 million, as well as in Non-Current Liabilities for CLP 266,632 million.

The growth in Current Liabilities is due to an increase in Other Financial Liabilities of CLP 102,538 million given the increase of bank's debt, partially offset by a reduction of CLP 83,570

[^9]million in Trade Accounts Payable and Other Accounts Payable, as a result of a $3.1 \%$ reduction of its balance YoY.

The increase in Non-Current Liabilities is mainly attributed to an increase in Lease Liabilities by CLP 116,065 million due to the renewal of long-term contracts specially in USA and Brazil. Furthermore, Other Financial Liabilities increased by CLP 87,811 million vs December 2022.

## Equity

Equity increased by CLP 245,436 million, due to a lower negative impact from lower levels of Other Reserves by CLP 283,723 million.

## Inventory Days

Supermarkets managed to reduce their inventory in 2.1 days, following a decrease in Argentina and Chile. In Home Improvement, a reduction of 13.0 days was recorded, driven by the lower accounting inventory in Argentina at the end of December 2023, which was impacted by the devaluation of the Argentine currency. Department Stores showed a decrease of 3.0 days, the result of the implementation of a more conservative purchasing policy, aimed at efficient inventory management.

## Average Collection Days

As of December 2023, the average collection days of Supermarkets remained stable, reaching 10.5 average days. Home Improvement increased its days by 1.6 compared to December 2022, explained by the increase in average collection days in Colombia. The above is due to lower income received, which in turn increased accounts receivable. Department Stores increased 6.2 days. Shopping Centers decreased their collection days by 16.7 days, reflecting the postpandemic financial recovery of tenants.

## Average Payment Days

As of December 2023, average payment days in the Supermarkets segment decreased by 5.0 days, with this reduction mainly driven by Brazil and Peru. Meanwhile, Home Improvement recorded a decrease of 2 average days, while Department Stores remained unchanged compared to 2022. Financial Services managed to reduce its average payment days by 7.0 days during the same period.

## Interest Rate Risk

At the end of 2023 and considering the hedges implemented through Cross Currency Swaps, $74.4 \%$ of the Company's financial debt was under a fixed rate, composed mainly of short-term obligations and bonds. The remaining percentage of the debt was subject to a variable interest rate. Within the variable rate portion, $83.6 \%$ was indexed to local interest rates (either due to its initial terms, or as a result of derived agreements). The Company's hedging strategy includes a periodic review of exposure to interest rate and exchange rate fluctuation risks.

## Currency Hedging

In the regions where Cencosud operates, most costs and revenues are in local currency. A large portion of the Company's debt is denominated or converted to CLP through Cross Currency Swaps. As of December 31, 2023, 64.7\% of total financial debt was in US dollars. Of this debt, $93.1 \%$ was covered by Cross Currency Swaps or other exchange coverage, such as net investment coverage and holdings in US\$. The Company's policy seeks to mitigate the risk of exchange variations on net liabilities in foreign currency, using market instruments designed for this purpose. With the effect of foreign exchange hedges (Cross Currency Swaps), the Company's exposure to the dollar was reduced to $4.5 \%$ of total gross debt as of December 31, 2023.

[^12]Cash Flow YTD 2023 (CLP Million)

## Operating Activities

As of December 2023, a greater flow from operating activities was recorded in relation to the same period in 2022, reaching CLP 1,599,517 million (excluding IAS 29), compared to CLP $1,193,505$ million in 2022. This increase was mainly explained by lower Payments to suppliers for the supply of goods and services associated with a more limited purchasing strategy and efforts to normalize inventory levels.

## Investing Activities

Investment activities were lower in 2023, recording a cash usage of CLP 443,276 million as of December 2023 (excluding IAS 29), compared to cash usage of CLP 711,393 million in 2022. The above is explained by a greater investment flow in 2022 associated with the acquisitions of The Fresh Market and GIGA Atacado. In 2023 the Capex was CLP 336,319 million.

## Financing Activities

The net cash used from financing activities amounted to CLP $1,024,895$ million as of December 2023 (excluding IAS 29), while in 2022 a cash usage of CLP 877,730 million was recorded. This result is due to the reduction of proceed from long-term loans, resulting from the debt acquired as a result of the acquisitions of TFM and GIGA Atacado.

## 11. Risk Management

Cencosud and its subsidiaries operate in a business environment that involves a series of intrinsic risks. In this regard, the Company maintains a 'Corporate Risk Management Policy,' as well as a series of related procedures, such as Internal Audit manuals and methodological frameworks for the management and administration of risks of all kinds, including those related to economic, environmental, and social aspects. The company's risk management structure is outlined by the Cencosud Board of Directors, and its implementation takes place at various levels of the organization.
In this context, Cencosud has a 'Corporate Internal Audit, Internal Control, and Risk Management Department,' which reports directly to the Board and supports the Corporate General Management in its responsibility to promote the implementation and operation of the Risk Management model. It acts as a key element in the control environment in the Company's Governance and planning structure, which has strengthened them to meet the highest global and local standards, such as those suggested by the Dow Jones Sustainability Index (DJSI) and Chile's Financial Market Commission (CMF) General Rule No. 461.
For more detailed information on Risk Management, you can refer to the Integrated Annual Report for the year 2022.
