

Integrated Environmental Management and Energy Efficiency Policy

At Cencosud we work to improve the quality of life of our customers, through a differentiated, sustainable experience with high standards in the offer of products and services.

This Integrated Environmental Management and Energy Efficiency Policy is in line with our Sustainability Strategy, and establishes the framework for reviewing, measuring and managing environmental and energy aspects and impacts to prevent pollution in our operations of premises, stores and distribution centers. That is why at Cencosud we are committed to:

- Comply **with legal, environmental and energy requirements.**
- Define environmental and energy **objectives and goals** based on management systems, ensuring **the availability of the information** and resources necessary to achieve the established objectives and goals.
- **Reduce greenhouse gas emissions** in our operations by **identifying, assessing, and managing environmental impacts.** This with the aim of protecting biodiversity and ecosystems, thus mitigating Climate Change.
- **Promote energy** efficiency in operations; in the procurement of products and services; and in activities that use energy (project design for facilities, equipment, and processes). Ensuring the **continuous improvement** of energy performance and the energy management system.
- **Adopt sustainable waste and water resources management** by prioritizing the circular economy.
- **Educate employees** in environmental management and energy efficiency to advance in the offer of **products and services with sustainable attributes for our customers.**
